

Yasin Bıyıklıoğlu

Email address:ysbiyiklioglu@gmail.com

Address:Tekirdağ/Malkara, Türkiye

PROFILE

As a computer engineering student, I am deeply passionate about creating innovative solutions at the intersection of machine learning, game development, and web technologies. Building on my hands-on experience with Python, PyTorch, C#, and Unity, I design and implement complex projects—ranging from AI-driven classification systems to interactive applications. My dedication to continuous learning and technical excellence drives me to build impactful projects that make a real difference in the evolving tech landscape.

EDUCATION

Bilecik Şeyh Edebali University

01/2021 – present

Malkara Anatolian High School

01/2017 – 12/2021

PROJECTS

Survival Game with Unity

This project is a survival game prototype developed for desktop platforms, where players must manage key survival parameters such as health, hunger, and thirst based on environmental factors. By integrating real-time data from Arduino sensors (such as temperature and humidity), the game creates a more immersive and dynamic survival experience. Players can gather resources, craft items, build structures, and explore an open-world island map. The project also features machine learning-based enemy AI that adapts to player behavior, making combat more challenging and unpredictable.

Deepfake Detection

Developed a deep learning system using PyTorch to detect deepfake images and videos. The pipeline performs facial extraction via MTCNN and processes frames through various architectures, including a Custom CNN, ResNet-18, and EfficientNet-B0. Trained on the FaceForensics++ dataset and tested for generalization on Celeb-DF. The final optimized model was deployed as a live interactive web application using Streamlit.

SKILLS

Unity · Machine Learning · React · Python · SQL · C#

CERTIFICATES

Introduction to C# Programming and Unity
University of Colorado System

<https://www.coursera.org/account/accomplishments/verify/TXRPLG5MQRDP>

Machine Learning with Python
